

Worship Kit Instructions

Included: heart box and lid, 2 oz. bottle of tacky glue, paper squares, Clear glass votive holder w/candle, and Cross.

Not included: a picture of your child (about 4" by 3") and a dampened paper towel to wipe off fingers

Cut picture to the desired size, leaving a border to allow framing with paper squares.

Spread paper squares out so you can see all the colors.

With your index finger, cover the back of child's picture with glue and center it on heart box lid.

Wipe your finger on the paper towel to remove glue between each step.

Place glue on the back of paper squares and overlap the first squares on top of the edge of your picture. After the picture is completely framed with squares, spread glue with your finger covering about a third of the lid and completely cover all glue with squares (the squares should overlap each other and also slightly over the edge of the lid). Repeat this step with another area on the lid until the entire lid is covered.

Glue down any loose paper edges on the lid top and side. Let dry completely. To finish your project, make a zigzag pattern of glue and spread evenly over the entire project with your fingertip. Be sure to cover the picture and all paper squares. Let dry completely. Smile and admire your beautiful "Worship Kit" Heart Box.
